ERNEST EDEM AMOAKU

HUMAN COMPUTER INTERACTIONS

CHAPTER 1 – THE HUMAN

1. Human can hear frequencies between
 - a. ..20Hz to 15kHz
 - b. 13Hz to 50Hz
 - c. 15Hz to 20kHz
 - d. 50Hz to 130kHz
2. Pain is received via the receptors
 - a. Thermoreceptors
 - b. ..nociceptors
 - c. painoreceptors
 - d. mechanoreceptors
3. Which of these is not a problem solving theory
 - a. Problem Space theory
 - b. ..Analysis
 - c. Gestalt
 - d. Skill acquisition
4. Iconic Memory is to Visual Stimuli whiles echoic memory is to
 - a. Sound stimuli
 - b. Tactile stimuli
 - c. Touch stimuli
 - d. ..Aural stimuli
5. Semantic memory structure does all the above except
 - a. Provides access to information
 - b. Supports Inference
 - c. Represents relationship between bits of Information
 - d. ..Keeps serial record of events

CHAPTER 2 – THE COMPUTER

1. Which of these is not an advantage of touch-sensitive screens
 - a. Good for menu selection
 - b. ..Text input is significantly enhanced
 - c. Its fast and requires no specialized pointer
 - d. Suitable for use in hostile environment
2. CRT and LCD are examples of
 - a. ..Bitmap screens

- b. Input devices
 - c. Text Optimization devices
 - d. Paradigms
- 3. This is a sort of Scanner
 - a. Flat-bed
 - b. Ink-jet
 - c. Laser
 - d. Bubble jet
- 4. The Virtual Memory is used as a temporary memory when the Is not enough
 - a. ROM
 - b. HARDDRIVE
 - c. RAM
 - d. DDRAM
- 5. TCP implies
 - a. Technical Com Protocols
 - b. Transmission Communication Protocol
 - c. Transmission Control Protocol
 - d. Technological Communication Protocol

CHAPTER 3 – THE INTERACTION

- 1. Ergonomics entails
 - a. The nature of user/system dialog
 - b. Translations between user and system
 - c. Social, organizational and motivational
 - d. Physical characteristics of interaction
- 2. This is not one of the seven stages of Donald Norman's model
 - a. Formulating action
 - b. User establishes the goal
 - c. Executes action
 - d. Interprets system stats
- 3. A mistake (is)
 - a. An incorrect action
 - b. May not have the right goal
 - c. Right idea with the wrong execution
 - d. Wrong idea and a wrong execution
- 4. WIMP implies
 - a. Windows, Icons, Mouse, Pointer
 - b. Wamp, Icons, Menus, Pointer
 - c. Windows, Icons, Mouse, Pointer
 - d. Windows, Icons, Mice, Pull-down menu
- 5. Which of these is a special kind of button
 - a. Check boxes
 - b. Text fields
 - c. Linked lists

- d. Drop-down menus

CHAPTER 4 - PARADIGMS

1. In Time sharing, a single computer could support multiple servers
 - a. True
 - b. ..false
2. allowed a computer operator to use the computer to create, very rapidly, sophisticated visual models on a display screen that resembled a television set.
 - a. CRT
 - b. Sketchpad
 - c. LCD
 - d. Tapping-Input
3. Which of the following is not part of the paradigms in Human Computer Interactions
 - a. Programming Toolkits
 - b. Networking
 - c. The world wide web
 - d. .. Artificial Intelligence
4. CSCW systems built to support users working in groups are referred to as
 - a. Merger
 - b. E-commerce
 - c. ..Groupware
 - d. Interaction systems
5. In context-aware computing the interaction is more implicit
 - a. Appropriate
 - b. Interesting
 - c. ..Implicit
 - d. Explicit

CHAPTER 5- INTERACTION DESIGN BASICS

1. A simple definition for design is achieving goals within constraints
 - a. True
 - b. False
2. Over time many people are affected directly or indirectly by a system and these people are generally called.....
 - a. Partakers
 - b. Design Personnel
 - c. The user
 - d. ..Stakeholders
3. In HCI, different contexts that change the interpretation of commands are called modes.
 - a. Highlights
 - b. Inputs
 - c. Modes

- d. Sketchpads
- 4. The process of making software suitable for different languages and cultures is called internationalization or
 - a. ..Localization
 - b. Delocalization
 - c. Generalization
 - d. None of the above
- 5. Prototyping is an example of what is known as a
 - a. Trial approach
 - b. ..Hill-climbing approach
 - c. Design-testing approach
 - d. None of the above

CHAPTER 6 – HCI IN THE SOFTWARE PROCESS

- 1. Which of these is not an activity in the software development life cycle
 - a. Evaluation of user/computer ergonomics
 - b. Architectural design
 - c. Detailed design
 - d. Requirement specification
- 2. The traditional usability categories adopted by the ISO usability standards 9241 includes all the following except
 - a. Efficiency
 - b. Effectiveness
 - c. ...Durability
 - d. Satisfaction
- 3. Which of these is not a type of prototype
 - a. ..Patch-by-patch
 - b. Incremental
 - c. Throw-away
 - d. Evolutionary
- 4. Design space analysis is structure-oriented
 - a. True
 - b. False
 - c. Not certainly
 - d. It depends
- 5. The Design Rational has both structure-oriented and design-oriented types
 - a. True
 - b. False
 - c. It has structure-oriented types only
 - d. It has design-oriented types only

CHAPTER 7 – DESIGN RULES

1. In HCI, principles supporting usability include all the following except
 - a. Learnability
 - b. Flexibility
 - c. Robustness
 - d. ..Readability
2. One of the following is not part of Norman's 7 Principles
 - a. Design error
 - b. Simplify the structure of tasks
 - c. ..Mistake analysis
 - d. Get the mapping right
3. One of the following is not part of Shneiderman's 8 Golden rules
 - a. ..Make less mistakes, less errors
 - b. Strive for consistency
 - c. Reduce short-term memory load
 - d. Support internal focus of control
4. One of the following is type of design rule in Human Computer Interaction
 - a. ..Standards
 - b. Increasing authority
 - c. Increasing generality
 - d. Focus
5. The Goal of interaction design is for maximum usability
 - a. ..True
 - b. False

CHAPTER 8 – IMPLEMENTATION SUPPORT

1. One of the following is an element of resource sharing
 - a. ..Resource-sharing
 - b. Networking
 - c. Batch-processing
 - d. The world wide web
2. One the following is not part of the three possible software architectures in HCI
 - a. Each application manages all processes
 - b. Management role within kernel of operating system
 - c. Management role as separate application
 - d. ..Application using virtual memory
3. Toolkits promote consistency and generalizability
 - a. ..True
 - b. False
4. Whiles lexical is associated with movement of the mouse, semantics is associated with.....
 - a. List highlights

- b. Menu highlights
 - c. ..Sum of numbers of change
 - d. None of the above
5. All the following are techniques for dialogue control except
- a. Constraints
 - b. Event language
 - c. ..Highlighting
 - d. Grammar notation
